

DR. ANNIE ANDREWS WILL FIGHT TO LOWER COSTS FOR FAMILIES LIKE YOURS

Dr. Annie Adnews Op-Ed: “Expand Healthcare Access, Lower Costs For Healthy Communities.” “We need to enact legislation that lowers the costs of prescription drugs. We need to fully fund Medicaid, and protect Medicare. We need to support affordable healthcare clinics in neighborhoods where access to medical treatment is lacking – because healthier communities are stronger communities. [...]Let’s work together to expand access to healthcare and lower costs for families.” [Greenville News, Dr. Annie Andrews op-ed, [7/27/26](#)]

Dr. Andrews Described To WCSC How She Has Seen Her Own Grocery Bill Rise. “Andrews says she has seen her grocery bill continue to rise. ‘While I’m also seeing very scary headlines about healthcare premiums rising. After One Year, OBBBA Handed \$83 Billion In Tax Breaks To Just Six Giant Companies In One Year. “As with the GOP’s 2017 tax legislation, experts warned that big businesses and ultrarich individuals would benefit from President Donald Trump signing the One Big Beautiful Bill Act last year, while everyday Americans would suffer, and a Monday analysis identifies some of the companies now paying billions of dollars less in taxes. The Institute on Taxation and Economic Policy (ITEP) ‘has tracked \$204 billion in federal tax breaks disclosed by publicly traded US companies so far for 2025’ the report says. ‘But those benefits were not spread evenly across the corporate sector: Six companies alone accounted for \$83 billion of them.’” [Common Dreams, [8/17/26](#)]

The OBBBA Was Projected To Save The Top 0.1% Wealthiest Taxpayers Over \$60 Billion In Tax Breaks In Just A Few Years. “The Joint Committee on Taxation, a nonpartisan committee of the U.S. Congress, estimates that, by 2027, the top 0.1% of taxpayers, of which the country’s estimated roughly 900 billionaires are merely a subset, will collectively save \$60 billion in federal taxes. The Big Beautiful Bill Act makes permanent the reduction in the top marginal tax rate from 39.6% to 37%, which was first enacted as part of President Trump’s 2017 Tax Cuts and Jobs Act. While it increases spending on border security and energy production, it imposes cuts to Medicaid and food assistance.” [Forbes, [7/9/25](#)]

It says, ‘Last week, she visited a \$2.8 billion data center under construction in Spartanburg. Before that, Andrews brought her Gas, Grits & Groceries Affordability Tour to Aiken, where she called for a two-year moratorium, an end to data center tax breaks, and legislation to keep data center costs off families’ power bills. Andrews’ plan would also stop data centers from passing their costs onto South Carolina families, end special tax breaks for data centers, and cut red tape standing in the way of new energy infrastructure that can help bring costs down.’” [Walterboro Live, [10/5/26](#)]

Dr. Andrews Was Endorsed By End Citizens United, Partially Due To Her Pledge To End Congressional Stock Trading. “End Citizens United (ECU), a leading national anti-corruption organization, today endorsed Dr. Annie Andrews for U.S. Senate in South Carolina. As A Doctor, Andrews Cared For Families Whose Kids Couldn’t Afford Medical Bills. “My priority will always be South Carolina families and their need for affordable AND accessible healthcare. As a doctor, my work has never been about which family votes red or blue, and as a Senator, I will maintain this stance. While progress has absolutely been made with the opening of the Roper St. Francis Healthcare Center in Summerville, there are still parts of the county that do not have immediate access to a hospital or urgent care center.” [Berkeley Observer, [6/3/26](#)]
